

# CSC 464 FINAL PROJECT

## Grading Criteria

---

Grading an app is very different from grading other computer science projects.

| Criteria          | Percentage |
|-------------------|------------|
| Idea/Concept      | 10%        |
| Proposal Document | 10%        |
| UI/UX             | 10%        |
| Code Quality      | 20%        |
| Implementation    | 50%        |

## Groups

---

The final project will be a group project, with 3-4 people in each group.

## Final Presentations (during final exam week)

---

You will have to create a powerpoint or Google/Canva Slide to demonstrate your project. Your slide should contain details of your group members (name, id etc.), screenshot of your final app's screen, details of a few features etc. Each group will be given 10 minutes to present and demonstrate their apps. Your grade will be based on this demo. All groups need to submit their source code for code review and plagiarism check. Do not just copy-paste, don't assume we won't be able to find the source from where you copied! I do take cheating (copy-pasting) very seriously. Just do what you learnt.
